

Erasmus Blended Intensive Programme

YOUR SENSORS AND SOFTWARE INSIDE A ROCKET!

SUMMER 2025

UNIVERSITAT
POLITÈCNICA
DE VALÈNCIA

h_da
hochschule
darmstadt

Introduction to Sensate-X

- BIP overview
- Webinars
- Teams
- Model rockets
- Hardware
- Software
- Sensors

Blended Intensive Programme Overview

1. Online learning (webinars)
2. Web based learning (wikipedia, AI, ...)
3. Team learning (across countries)
4. Hands-on learning (Summer camp in Darmstadt)
5. Launch Day 2025

BIP Timeline

May

- Introduction (May-20)
- Team assignment / Webinars

June

- Team setup and project outline
- Preparation for the Summer Camp

July

- Summer Camp (Jul-2 ... Jul-9)
- Launch Day + Awards Ceremony

Webinars

<https://et.utcluj.ro/sensate-x/webinars.html>

1. Introduction to Microcontrollers
2. Introduction to ARDUINO IDE & Libraries
3. Using Sensors & Actuators,
Communication Technologies

Teams

- Projects shall be developed in international teams
- ~ 50 students from 4 countries are nominated
- 10-15 teams (4-5 students per team)
- Tasks until summer camp:
 - Team assignment (done by BIP coordination team)
 - Project outline until June-10 (each team)
 - Project outline review (BIP coordination team)
 - Request for parts until summer camp (each team)
 - Shops: <https://eckstein-shop.de>, <https://www.conrad.de>, <https://www.reichelt.de>
 - 3D printers available at h_da

Summer camp at h_da

- Jul-2 Welcome Day
- Jul-3 Project workshops
- Jul-4 Project workshops
- Jul-5 Field trip
- Jul-6 Free time
- Jul-7 Project workshops
- Jul-8 Launch day
- Jul-9 Awards Ceremony

Model Rockets

Model Solid Rocket Engine

Sagitta

L 615 mm
ø 35 mm
2 stages
1x C6-0
1x A6-4
235m

Auriga

L 895 mm
ø 50 mm
1 stage
2x C6-5
1x C6-P
225m

A6M2C

L 665 mm
ø 50 mm
1 stage
1x C6-3
48 m

A6M1C

L 665 mm
ø 50 mm
1 stage
4x C6-P
1x B4-4
31 m

EUROPEAN UNIVERSITY
OF TECHNOLOGY

Hardware

- ESP32 S3 μ Controller
- BMP280 pressure sensor
- QMI8658C IMU
- Lithium Battery charger
- USB-C
- STEMMA/QT-Connector
- 1.14 inch TFT display

Hardware

<https://de.aliexpress.com/item/1005006455931427.html>

Software Arduino IDE

Software Arduino IDE

- Sensors and display need libraries
- A start sketch has all the basics already implemented
- Start sketch can be downloaded here:

<https://et.utcluj.ro/sensate-x/resources.html>

BMP280

- Pressure: 300...1100 hPa
- Temperature: -40...85°C
- Absolute accuracy: $\sim \pm 1$ hPa
- Resolution: 0.01 hPa (< 10 cm)
- Interface: I2C / SPI

<https://www.bosch-sensortec.com/products/environmental-sensors/pressure-sensors/bmp280/>

QMI8658

Low Noise, Wide Bandwidth 6D Inertial Measurement Unit with Motion Co-Processor and Sensor Fusion

- Accelerometer and gyroscope sensors
- Complete inertial measurement unit (IMU) with sensor fusion library with specified orientation accuracy of $\pm 3^\circ$ pitch and roll, $\pm 5^\circ$ yaw/heading
- Large sensor dynamic ranges from $\pm 16^\circ/\text{s}$ to $\pm 2048^\circ/\text{s}$ for gyroscope and $\pm 2 \text{ g}$ to $\pm 16 \text{ g}$ for accelerometer

QMI8658A LGA-16

PCB

- QMI8658C IMU
- BMP280 pressure sensor
- ESP32 S3
- WLAN/BT-Antenna
